# MAMMA MIO!

OCTOBER 15-  
JANUARY 08,  
2011

*Paul is a well-adjusted young man who, along with his older brother Brad, grew up in a happy home. The boys are now in university and still live with their Dad, Norman, who has been raising them on his own since their mothers passing a few years ago. As Paul approaches his 18<sup>th</sup> birthday, he receives a letter from the social agency that arranged his adoption, informing him that his "Birth" mother would like to meet him. Unfortunately, the provincial archives suffered a fire and based on the data they managed to recover; it seems Paul's "Birth" mom could be any of three ladies, all whom requested to meet the child they gave up for adoption. Paul has been considering how he wanted to follow up with this news. Unbeknown to him, his Father sends letters to all three women inviting them to Paul's 18<sup>th</sup> birthday party and the opening of Norman's new restaurant – "Characters" ... all three ladies accept! Brad brings Paul to tonight's surprise party where we all are waiting to help him celebrate! Featuring music of ABBA and the Bee Gee's we invite you to our presentation of this lighthearted spoof "Mamma Mio!" Join Paul at the most surprising birthday party of his life!*

# ASM Education/Training

---

ASM's training can help you and your company:

- Improve performance in a relatively short amount of time
- Keep up with the latest technical advances
- Refresh your knowledge in an important but seldom-used technical area
- Satisfy your customers' demands for improved productivity at lower cost
- Make new staff productive as quickly as possible

Since 1954, thousands of technicians, engineers and other materials professionals have strengthened their skills, knowledge and careers through ASM Materials Engineering Institute.

We also offer certificate of achievements for satisfactory completion of a structured course of study in metallography (introductory, intermediate and advanced). Extension diplomas may be earned in eight technical areas ranging from applied general metallurgy to welding metallurgy.

Browse online by topic to look for seminars by technical interest area, or view our course calendar to see seminars by date.

- Take a tour of our new training center
- Read some of the biographies of our instructors
- View the types of training program we offer including seminars courses, videos, self-study and on-site training.

## On-Site Training

Cost-effective training at your plant is just a phone call away. Anywhere from six to 60 of your key staff might need training, but you can't afford to send them all to MaterialsPark. So instead, let us bring one of our seminars to you!

- Avoid the downtime and expenses associated with travel and time away from your plant
- The more employees you train, the lower your cost-per-employee
- No university or organization can match the practical, industrial experience of our adjunct faculty--more than 200 instructors who are experts in their fields and know how to teach
- ASM course materials are written for maximum understanding and become valued information sources long after the course's completion

If you can't find a course that fits your needs, then let us create a Customized On-Site Training solution for you. Or if you'd prefer to teach a course yourself, we can provide you with the Materials for On-Site Training. Just tell us your needs and constraints, and we'll get you everything you need to administer the course the way you want.

**Contact Ben Urbanietz, P.Eng, Education& MEI Chair, at 204-224-1654 for all of your ASM Training/Education needs.**

### ASM International:

ASM International is a society whose mission is to gather, process and disseminate technical information. ASM fosters the understanding and application of engineered materials and their research, design, reliable manufacture, use and economic and social benefits. This is accomplished via a unique global information-sharing network of interaction among members in forums and meetings, educational programs, and through publications and electronic media.

For more information about ASM and its benefits visit the official website at [www.asminternational.org](http://www.asminternational.org)
